

# PROJECT EVALUATION

(link to github repo)

(Link to Firebase deploy)

	SCORE	0 - DOES NOT MEET   1 - MEETS EXPECTATION   2 - EXCEEDS EXPECTATION	COMMENTS
<b>Project Workflow</b>		You completed the user stories, wireframes, task tracking, and/or ERDs, as specified in the project prompt. You've used source control as expected for the phase of the program you're in (detailed in the project prompt).	
<b>Technical Requirements</b>		You delivered a project that met all the technical requirements in the project prompt. Given what the class has covered so far, you built something that was reasonably complex.	
<b>Creativity</b>		You added a personal spin or creative element into your project submission. Delivered something of value to the end user.	
<b>Code Quality</b>		Followed code style guidance and best practices covered in class, such as spacing, modularity, and semantic naming. You commented your code as suggested in the project prompt.	
<b>Problem Solving</b>		You are able to defend why you implemented your solution in a certain way. You demonstrated that you thought through alternative implementations.	

	TOTAL	HIGHLIGHTS	GROWTH OPPORTUNITIES	OVERALL COMMENTS
<b>Total</b> <i>Take the average of all categories, round to nearest tenth of an integer.</i>
